Software Engineering student and filmmaker focused on creative tech, web development and accessibility

EXPERIENCE

KONTROL ENERGY | Toronto - remote , June 2020 - onwards

Full-Stack Developer Intern

- Developed the entirety of a React  custom dashboard maker which pulls real-time energy metrics from buildings, eliminates the need for technical skills when creating dashboards and cuts implementation time from ~2 hours to 10 minutes/dashboard
- Analyzed 4 different data transmission technologies and ranked them on 6 key metrics before developing the architecture of the dashboard maker and documented the process

LISTING BIRD | San Francisco - remote , May 2020 - onwards | Part time

Frontend Developer and Media Intern

- Frontend development on the main application using Angular , Typescript  and PHP  following an agile workflow
- Created dozens of graphics and 4 videos based on marketing needs and trained other interns in video editing and content creation

CIRQUE DU SOLEIL | Montreal , May 2019 - March 2020

Software Engineering Intern for Nextasy, Cirque du Soleil's Innovation Laboratory

- Developed the entirety of a Python  Raspberry Pi  application to control technological fashion pieces and presented at the 2019 September New York Fashion Week and at the 2020 Partner keynote at SAP's FKOM in Barcelona
- Managed the development workflow, introduced Git for storage and developed the entirety of two R&D projects aimed to further live entertainment by exploring computer vision and fashion technology , presented findings to non-technical team

EXPLORANCE | Montreal , 2018 (4 months)

Media Intern for the Community Engagement and Learning Center Department

- Created 5 motion graphics videos in After Effects  on multiple facets of the Blue software to diversify training methods

JEWISH ELDERCARE CENTER | Montreal , 2018 - 2019 (1 year and 3 months)

Maimonides Intensive Summer Session for Individual Volunteer Experience (M.I.S.S.I.V.E) Program Coordinator

- Placed volunteers in appropriate departments based on interest and skills, addressed issues with supervisors, organized daily lectures with healthcare professionals and introduced a new feedback system to improve volunteer's experience continuously

EDUCATION

MCGILL UNIVERSITY | 2017- May 2021

Bachelor of Engineering, Software Engineering

- Awarded the McGill Entrepreneurship TechAccel Grant 2020 and Desjardins academic success and involvement scholarship 2017
 - President of the Engineering Undergraduate Society's videography and film committee (<http://bit.ly/tpsmcgill>) 2018-2020
 - Design Lead and Frontend developer for the McGill Google Developer Student Club *current*
 - Head of Communications Coordinator for the 2020 McGill Engineering Orientation Week 2020
 - Electrical, Computer and Software Engineering Student Society (VP Communications 2019-2020) (VP Administration 2018-2019)
- Courses** : Computer graphics, Artificial Intelligence, Algorithm design, Databases, Software Delivery, Software Validation, Signals and Networks

ENGINEERING PROJECTS more on massivam.github.io/portfolio

Co-founder of Buzzle | current | McGill Engine TechAccel Startup Grant github.com/MassivaM/buzzle-website

- IPadOS application for real-time VFX and animation editing in a fast and intuitive way using the Apple Pencil built in Swift and C++

Co-founder of Thankloop | current | github.com/MassivaM/thankloop

- React , GraphQL , MySQL  web app which enhances your wellbeing and those of others by sending positive thank you messages

McGill 2020 Engineering O-Week website | 2020 | github.com/MassivaM/frosh2020 oweb.mcgilleus.ca

- React  website which displays information about O-Week , a blog with articles for first years and an easy way to register

KARPOOL | 2018 | <https://github.com/ECSE321-Fall2018/t14-web>

- VueJS web application and Android app which facilitate intercity carpooling built with Java , Spring  and Maven,

AUTOMATED ROBOT OBJECT COLLECTOR | 2018 | Project Manager | Java

- Responsible for overseeing a team of 6 members in a 6-week robotics challenge, set goals and deadlines using Gantt charts

SKILLS

- Programming languages** : JavaScript, HTML, CSS, SCSS, Java, ES6, C, SQL, PHP, Python
- Tools** : React, GraphQL, Jest, VueJS, TravisCI, Git , Android, OpenCV, Spring, Maven, Linux , MySQL, Redux, Adobe Suite
- Languages**: French , English , Berbere, Spanish (conversation proficiency)
